This is our '72 with the Kohler  
8hp engine, now with 6100+  
hrs on it. We used 1 1/2"  
plumbing pipe which slides  
right in to the frame...the  
hydraulics to the front wheel  
have been capped; and the  
base for the blowers was  
made from flat plate and  
rectangular tube stock...
