

Here is one of our GM's. The dew whip holder on the bottom left and a coffee cup holder on the steering arm. Gotta have that coffee with you when you mow. Broom holders hold the ball mark repair tool.

And yes to get it there and it's not too hard keeping it that way.

When reels get all my equipment stays that clean and better as long as I am there.

Took a long time washed the equipment gets sprayed down and a 1min wipe down with a towel is all it takes.
