

Foley Roller Hold Down

If you've ever seen a Neary grinder, you know I didn't invent this. If you have a Foley grinder, you know how cumbersome, heavy, and overall PITA the reel hold-down can be. With a Quick-Clamp, a piece of flat bar, a little custom fitting (grinding) and you have a quick install, lightweight, hold-down. I did this about 4 years ago, but wanted to make sure it worked before posting here, or I just resurrected the computer with the photos. 🙌
