The sharpest choice in parts.

John Deere Genuine Parts Quick Reference Guide Golf and Turf 2010 KEEP GREEN

This literature has been compiled for worldwide circulation. While general information, pictures and descriptions are provided, some illustrations and text may include financial, credit, insurance, product options and accessories NOT AVAILABLE in all regions. PLEASE CONTACT YOUR LOCAL DEALER FOR DETAILS. John Deere reserves the right to change specification, design and price of products described in this literature without notice. John Deere's green and yellow color scheme, the leaping deer symbol, and JOHN DEERE are trademarks of Deere & Company.

Make getting parts this easy.

Order a Parts Onsite Cabinet for your shop.

Instantly get the parts you need with a handy Parts OnSite cabinet—with high-volume parts stocked and replenished by your John Deere distributor. You can tailor the stocking plan to suit your tastes. And even qualify for bulk discounts. Talk to your John Deere Golf rep about ordering one for your shop, today.

Stock up on your parts now and pay later with John Deere Credit's No Interest and No Payment plans.*† See your nearest distributor today for details.

*For customers residing in the United States: Offer ends February 22, 2010, and is subject to approved credit on John Deere Credit Revolving Plan, a service of FPC Financial f.s.b. After promotional period finance charges will begin to accrue at 19.8% APR. A \$1.00 per month minimum finance charge may be required.

†For customers residing in Canada: Offer valid from November 6, 2009 until February 22, 2010. Subject to AgLine™ approval and dealer participation. For purchases on AgLine agricultural, consumer and commercial accounts only. Offer is unconditionally interest free for the first 60, 90, 180 days. After the 60, 90, 180 day period, for eligible purchases of goods and services: 1) minimum monthly payment required (see example below); and 2) finance/credit charges will begin to accrue immediately on amount financed at 19.75% per annum until paid in full. Down payment may be required. A statement of account will be provided monthly. For example, after the 60, 90, 180 day period, based on an average parts transaction price of \$250[†] less a down payment of \$0.00, to be financed for a maximum of 107 monthly payments of \$5, totalling \$535.00 based on **19.75% APR/ACR** with a cost of borrowing/credit of \$285.00 results in a total amount to be paid of \$535.00. [†]Taxes, setup, delivery, freight, and preparation charges not included and may increase price or monthly payment(s). Minimum finance amount may be required. See your dealer for details. Program subject to change, without notice, at any time.

AgLine™ is a trade mark of Deere & Company, used under licence by John Deere Credit Inc.

-------------------	-----

How using genuine parts gives you an edge.

Look into the details and you'll see what appear to be cheaper imitations usually end up costing more in the long run. Independent testing proves these will-fit parts require more adjustment and grinding. And the extra time spent maintaining (and replacing) them, adds up to more downtime and lost productivity for you and your crew.

Since genuine John Deere service parts are designed and manufactured with the same attention to quality as the machines they are installed on, they maximize your efficiency and keep your course looking sharp.

Reel strength

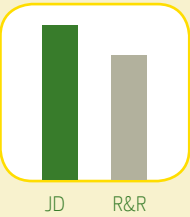

JOHN DEERE REELS

Independent testing shows that John Deere reels hold the edge 15%-20%* longer than will-fit parts, resist becoming “cone-shaped” and have better impact resistance.

Here’s why: Our blade material is an AISI Chrome Alloy steel cold-rolled, formed and welded robotically into the reel assembly. And our specs for edge retention, and hardenability are superior to those of regular mill run steels using induction heat treatment hardening. (Lower quality steel’s lack of uniform hardness reduces the effectiveness of heat treating and results in more frequent grinding to maintain a sharp edge.)

15%-20% LONGER EDGE RETENTION

*According to independent tests of R&R reels vs. John Deere reels.

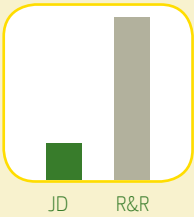

Go into overtime.

JOHN DEERE TINES

Our proprietary manufacturing process creates a range of tines for our Aercore™ aerators that are unparalleled in quality and efficiency. In comprehensive independent wear testing, John Deere tines outperformed will-fit tines in the areas of plugging, breaking and overall wear. The John Deere HD top-eject tine provides at least a 3-4 times better performance than a typical will-fit tine. Alternate brands plugged 78% to 87% of the time, more than three times as often as our HDT tines.*

78%-87% LESS PLUGGING

*5/8" tubular tines, 1.5" hole spacing on average in soil high in clay. According to independent tests of R&R tines vs. John Deere tines.

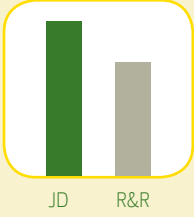

Made to match.

JOHN DEERE BEDKNIVES

Independent testing proves John Deere bedknives hold their edge 25%* longer than imitations. Our knives use high-carbon alloy steel that is Austempered resulting in higher impact resistance, yield, and tensile strength. Plus, they precisely match the tolerances of our reels, with mounting holes designed specifically for this application.

25% LONGER EDGE RETENTION

*According to independent tests of R&R bedknives vs. John Deere bedknives.

Error free.

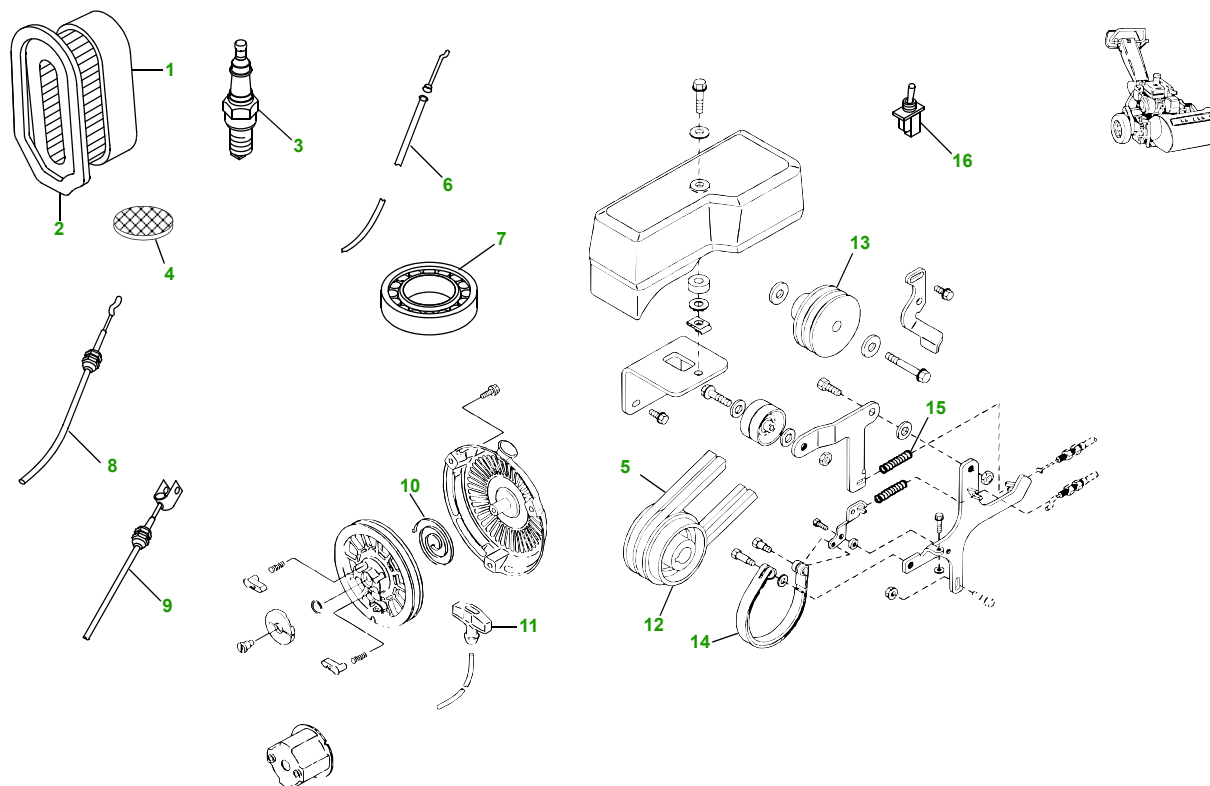

JOHN DEERE ROLLERS

John Deere rollers are machined to provide the truest cutting height.

And that's just the start of the benefits: John Deere 3" rollers have greaseable, double-sealed bearing assemblies and our 2" rollers use integral shaft greaseable bearings that assure reliability. We also offer exclusive "spiral" rollers that "rough up" the turf for a smoother cut, plus create a sweeping action that prevents buildup on the rollers and grass clumping.

Pressure Washers

GP-3000GH GatorPal™

- 3000 psi @ 3.0 gpm
- 6.5 hp, 196cc Honda OHV engine
- For Gator weight capacities up to 1,000 lb. max
- 65-gallon holding tank
- 100-foot hose reel
- 2 year warranty (5 yrs on pump)

PR-3000GH

- 3000 psi @ 2.4 gpm
- 6.5 hp, 196cc Honda OHV engine
- Direct-drive triplex crankshaft pump with solid ceramic pistons
- 2 years consumer, 1 year commercial warranty

PR-4000GH

- 4000 psi @ 3.4 gpm
- 13.0 hp, 389cc Honda OHV engine
- Direct-drive triplex crankshaft pump with solid ceramic pistons
- 2 years consumer, 1 year commercial warranty
-

AC1-CG16H

- 6.5 horsepower, 196cc Honda OHV industrial engine
- Alternator - 1600/600watts rated output
- Compressor - 10.9 cfm @ 125 psi

AC2-CG35H

- 13.0 hp, 389cc Honda OHV industrial engine
- Alternator - 1600/600 watts rated output
- Compressor - 10.9 cfm @ 125 psi

Air Impact Wrenches

AT-3106-J

- 700-ft lb of torque
- 1/2" square drive
- 90 psi operating pressure
- 5.5 cfm air consumption
- 2 year warranty

AT-3104-J

- 1,200-ft.-lb of maximum torque
- 3/4" square drive
- 90 psi operating pressure
- 7.5 cfm air consumption
- Dynapact clutch for high torque output
- 2 year warranty

ET-3101-J

- 125 ft lb maximum torque
- Heavy duty 1/2" square drive
- 5 year limited warranty
- Includes two 2.0 Ah batteries, universal charger and plastic carrying case

ET-3104-J

- 162 ft lb maximum torque
- Heavy duty 1/2" square drive
- 5 year limited warranty
- Includes two 2.0 Ah batteries, universal charger and plastic carrying case

Tine Options To Meet Virtually Any Application

There are several types and sizes of tines available for varied customer needs:

- Open side - 1/4-in. (6.35 mm) mini tine and 3/4-in. (19.05 mm).
- Tube type - 3/8-in. (9.5 mm), 1/2-in. (12.7 mm), 5/8-in. (15.9 mm) and 3/4-in. (19.05 mm).
- Solid - 3/8-in. (9.5 mm) mini, 5/8-in. (15.9 mm), 5 mm needle tines and 8 mm needle tines.
- HD and HDT tines.

The HD and the HDT are identical in every way except the HDT has a hardened tip that increases the life by 3-4 times. The changing of tines during the aeration process increases downtime and labor cost of the golf course or sports facility. The HD and HDT tines will last longer than most other tines due to the thickness of the walls, thus resulting in less downtime for our customers.

The other benefit that customers will see with the longer wear of these tines is consistent hole depth from green to green. When a tine wears it becomes shorter, thus it is not pulling the same plug and it can also cause unfavorable results in hole quality. The HD and HDT tines will wear longer and keep the depth consistent and good hole quality longer.

When choosing the proper size tine you must determine what size hole and/or plug the customer wants to achieve. Using the chart below you can determine the ID (inside diameter) or OD (outside diameter) of the tine. In some cases, to achieve desired results, you may need to go to a larger size tine than previously used.

	John Deere Part Number	Description	Length (mm)	Mount (mm)	ID (mm)	OD (mm)
